

MPAs increase kelp biomass via post-establishment divergence

Illustrative example: *M. pyrifera* at Scorpion SMR (simulated data modeled on observed patterns)

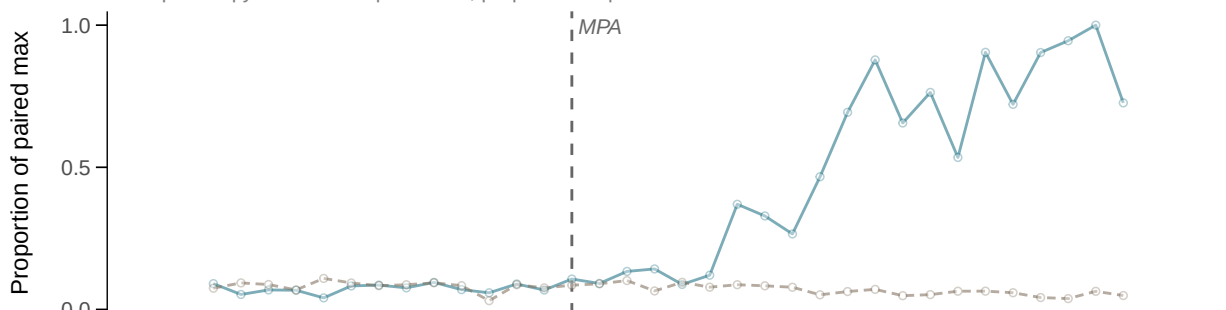

(a) Raw kelp biomass

Example: *M. pyrifera* biomass at Scorpion SMR (simulated)

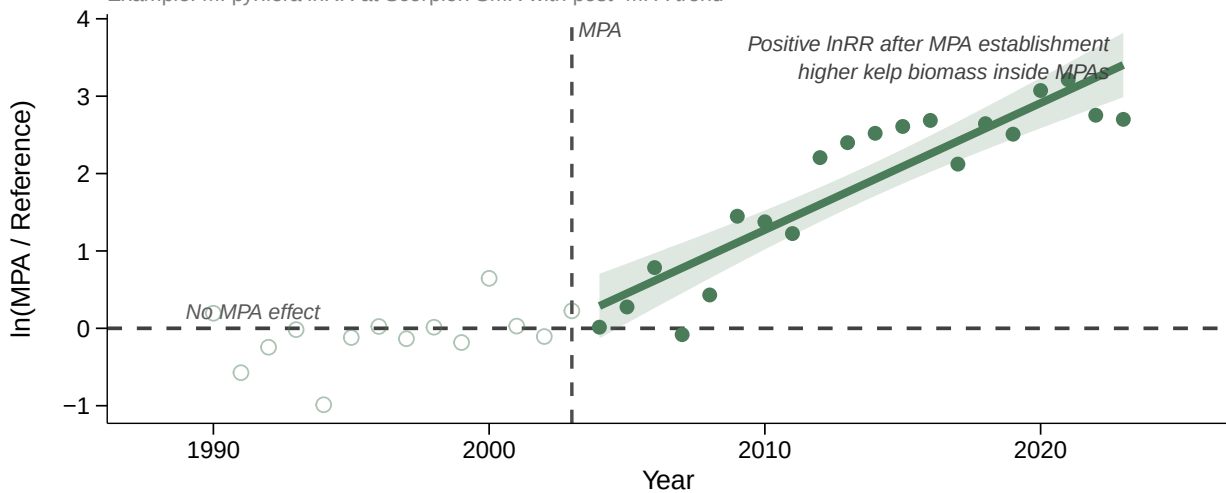

(b) Standardized

Example: *M. pyrifera* at Scorpion SMR, proportion of paired maximum

(c) Estimated MPA effect

Example: *M. pyrifera* $\ln\text{RR}$ at Scorpion SMR with post-MPA trend
